

An AI-driven, Human-assisted Virtual Recruiting Service

What we do

- Celential offers an AI-based Virtual Recruiter service that assists with sourcing, vetting, and recruiting with a current focus on technical and sales talent.
- Celential targets and activates passive candidates, who account for more than 75% of the talent market.
- We deliver ready-to-interview candidates to customers directly. No learning curve required.

How we make it happen

- Celential's AI Engine actively graphs talent and companies in the United States and Canada using thousands of signals and hundreds of data sources.
- Our Virtual Recruiter identifies passive candidates of mutual fit and engages with them via highly automated personalized emails.
- Powered by proprietary AI, ML, and NLP, we proactively target diverse candidates from passive and overlooked talent pools.
